

GCMS ANALYSIS SUMMARY

Ylang Ylang Complete *Cananga odorata*

This GCMS analysis summary represents each chemical family's total percent (%) present in the essential oil. Because the environment and growing conditions naturally vary, impacting plant ingredient variances, this analysis is not lot-specific but a good representative of the oil quality.

Sesquiterpenes

Analgesic
Anti-bacterial
Anti-fungal
Anti-inflammatory
Anti-spasmodic
Hypotensive
Sedative

Best for...

Skin care
Hair care
Stress
Sleep
Hormones

WHY YOU'LL LOVE OUR OILS

WHY YOU SHOULD TRUST OUR OILS

- **Our essential oils are pure, authentic, 100% natural, and not diluted or adulterated.**
- Our essential oils come from Madagascar, an island rich in fauna and flora and known for its healing, medicinal, and endemic plants.
- **Each essential oil has been analyzed with the best available analytical techniques.**
- Dr. Prabodh Satyal's laboratory, an expert in essential oil testing, purity, and adulteration, has tested each of our essential oils.
- Our suppliers in Madagascar have been vetted.
- **Our founder, Dr. Patty has traveled to Madagascar and assessed each supplier based on their best practices, community endeavors, environmental projects, and, of course, their product qualities.**
- Dr. Patty, also a chemist, understands the meaning of high-quality essential oils. She has experience testing plant active ingredients.
- **Dr. Patty ensures that you have the best and highest quality essential oils for your wellness and everyday use.**
